DETAILED ACTION

*Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. The following claims are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. In claim 1, the Applicants recite "rubber-type composition." The term "type" is considered indefinite because such language tends to go beyond the scope of the terms intended meaning.

4. In claim 1, the Applicants recite "compatible with and co-polymerizable with said vulcanizable rubber composition." The language is indefinite because it is not clear if the Applicants are referring to the polymer or the metal reinforcement element.

Art Unit: 1713

5. In claim 8, the Applicants recite, "the outward directed first functional groups." There is insufficient antecedent basis for this limitation in the claim.

6. In claims 10, 13-15 and 34-36, last line, please replace "or" with --and-- to place the claim in a proper Markush format.

7. In claim 22, what's "n."

8. In claim 38, "rubber-like" is indefinite.

9. In claims 33-34, the Applicants recite, "selected from the group consisting of the acid anhydride group [the acid chloride group]." This is not a proper Markush format. What is the purpose for the acid anhydride group and the acid chloride group.

***Claim Rejections - 35 USC § 102***

10. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Art Unit: 1713

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

11. Claims 1-42 are rejected under 35 U.S.C. 102(b) as being anticipated by Drake et al., U.S. Patent No. 5,300,569

(hereinafter "Drake").

12. Drake teaches adhesive rubber compounds capable of adhesion to a broad, general range of materials and are useful for bonding elastomers to other elastomers and to metals. See Drake, Abstract; col. 4, lines 37-66; col. 5, lines 14-32. Drake further teaches the process preparing the curable adhesive elastomeric composition comprising a di-carboxylic acid. See Drake, col. 9, line 55 through col. 10, line 21. Also, throughout the example section, Drake teaches the adhesion to stainless steel. Thus, Drake anticipates claims 1-42.
